

TOTEM INSTALLTION GUIDE

Preparations:

The following is a list of installation tools which may be helpful for installing the pole in the ground.

Item	Qty	Comment
Ladder	1	6' height
Leveling bubble	1	
Metal fence post driver	1	

- Ladder 6' height
- Metal Fence Post Driver/SledgeHammer

The following list of components is required for complete assembly of the TOTEM

Item	Qty	Comment
Bead	XX	
Pipe	1	1/2" diameter X 8'

Assembly:

Follow the list of steps to complete assembly of the TOTEM.

1. TOTEM rod installation
 - a. Determine the rod length based on TOTEM height. The rod length should be 2' longer than the TOTEM height (e.g., 6' TOTEM requires a $6 + 2 = 8'$ rod).
 - b. Drive rod into firm soil leaving enough length exposed to install the TOTEM beads.
2. Unpack all beads and line up in sequence according to number taped on beads.
3. Starting with number "1", 'Twist' first piece to that it seats into the footing (dirt, gravel, etc..)
4. Install remaining components on pipe, aligning each for its' best fit with adjacent pieces.
5. Caution: ceramics are durable but reasonable care must be taken to avoid chipping or breaking. Do Not drive the pipe into the ground with any beads in place.
